PROJECTS

Wear2Care {ReactJs, NodeJs, MongoDB } [GitHub](#) | [Live Preview](#)

Aug 2024

- Wear2Care is a unique platform dedicated to promoting sustainable fashion and helping those in need. Our goal is to provide a seamless experience for users to buy high-quality second-hand clothes and easily donate their gently used items to NGOs. By bridging the gap between sustainability and charity, Wear2Care aims to make a positive impact on both the environment and our communities.

TimeGaze (Chrome Extension){HTML, CSS, JavaScript } [GitHub](#)

June 2024

- The Screen Time Tracker Task Reminder Chrome extension helps users monitor their screen time on individual tabs, providing reminders to take breaks It's designed to promote healthier browsing habits and improve productivity by keeping track of time spent on each tab and .

School Management System{HTML,CSS,JavaScript,PHP,MySQL } [GitHub](#) | [Live Preview](#) *Jan 2023 - April 2023*

- Created a web application that is focused entirely for a School's overall performance. It streamlines administrative tasks in educational institutions.

- It offers features like record management, grade management, and communication tools.

- This system enhances efficiency, reduces paperwork, and facilitates better communication between administrators, teachers, and students, ultimately improving overall school operations.
